

Techno – Commercial Executive:

MagGenome is primarily focused on the development of Magnetic Nanoparticles based products. The current initiatives include developing nucleic acid extraction kits using our patented Magnetic Nanoparticles-based technology. The company has developed DNA extraction kits under the brand name XpressDNA and affinity resins under the brand name XpressAffinity. Most of the pipeline products are a result of academic research conducted over the years. With a mission to be the preferred supplier for the scientific community, we are continuously striving to delight our customers who are drawn from various industries such as academia, research laboratories and corporate research labs.

To meet our growth objectives, we are planning to take on board young, dynamic, energetic Techno – Commercial Executive for Kerala, Hyderabad, Ahmedabad and Northeast.
